

SAY IT WITH LOVE

©1993

There's a world full of people looking for the way
They hear a lot of talk, but what do we say?
There's a church on every corner of every town
If you understand the doctrine, then come on down
Oh, it's all so simple yet we've made it so hard
Time to put aside differences, love them as they are

You could say it with words
But when push comes to shove
Only one way they'll know
You've got to say it with love
You could write it in the sky
But it wouldn't be enough
Only one way they'll know
Say it with love

There's a heart so lonely, praying for a hand
To take them down the road to the promised land
Well, the path that we are walking is the only one they see
Are we leaving them behind, just within our reach
Oh, let's take them by the hand and open up our hearts
Gotta lead them to the kingdom, you know where to start
